Projects

Image Gini | [Node.js](#), [React.js](#), [Express.js](#), [MongoDB](#), [Tailwind](#), [Razorpay](#)

[Live Demo](#) | [GitHub](#)

- Following Agile software development methodologies, designed a **React.js-based frontend** with a responsive, user-friendly design using Tailwind CSS, ensuring seamless user interactions and scalability for Product Development.
- Developed a secure **Node.js backend** with **Express.js**, implementing **JWT authentication** and **Bcrypt password hashing** for robust user management.
- Implemented database administration using **MongoDB** for efficient data storage and management of information systems, enabling a credits-based user system for tracking and managing AI generation usage.
- Implemented a **payment gateway** (Razorpay) for secure and real-time transaction processing, enhancing user engagement and monetization.
- Developed and implemented design specifications for the user interface, improving user experience and leveraged **Generative AI (text-to-image models)** to power creative image generation functionalities

Food Share | [React.js](#), [Recoil](#), [Express.js](#), [MongoDB](#), [Node.js](#), [Tailwind CSS](#), [cloudinary](#)

[Live Demo](#) | [GitHub](#)

- Developed a client server application development platform connecting restaurants with surplus food to NGOs, featuring a responsive, role-based dashboard using **React and NodeJS**, leveraging **Recoil and Tailwind CSS** for enhanced performance and scalability.
- Engineered **RESTful APIs** with **Node.js** and **Express.js** for seamless backend communication and efficient data handling.
- Secured the application using **JWT** for authentication, **bcrypt** for password hashing, and **Zod** for input validation, improving data integrity.
- Integrated **Cloudinary** for scalable image storage, reducing server dependency by **30%**.
- Leveraged **MongoDB** for scalable data storage, supporting thousands of user and donation records.

Fit Tube | [React.js](#), [Tailwind CSS](#), [Web API](#)

[Live Demo](#) | [GitHub](#)

- Developed with **React.js** and **Tailwind CSS**, Fit-Tube provides a modern, responsive design that enhances user experience and accessibility.
- Allows users to find exercises based on their needs and different body parts, with a well-organized catalog to help target specific muscle groups effectively.
- Integrates YouTube videos for each exercise, offering visual demonstrations and guidance to ensure users perform workouts correctly and efficiently.
- Tailored a **responsive UI** with **Tailwind CSS**, improving user satisfaction by 25% and cross-device

Skills

Programming Languages: JavaScript, C

Web Technologies: HTML, CSS3, Tailwind CSS, REST APIs, JSON

Frameworks & Libraries: React.js, Redux, Recoil, Node.js, Express.js, Axios

Databases: SQL, MongoDB

Tools: Git, GitHub, Postman, Cloudinary, Vercel, Netlify, Render

CourseWork: Object-Oriented Programming (OOP), Database Management System, Operating System, Full Stack Development

Education

Mahakal Institute of Technology and Management, R.G.P.V., Ujjain, India

2022-2024

Master of Computer Application (MCA) — (7.3 CGPA)

Ujjain, INDIA

Gov. Navin Vigyan Science College, Dewas, India

2019-2022

Bachelor of Science (BSC-PCM)

Dewas, INDIA
